

**RESTRICTED ELECTIVES  
FOR  
ANIMAL AND POULTRY SCIENCES MAJORS**

**For Students Graduating 2011 or Later**

**PRODUCTION-BUSINESS OPTION**

The purpose of the restricted elective credits in the program of an Animal and Poultry Sciences student who has chosen the **Production-Business Option** is to allow for either an in-depth development in the business area or a broad-based expertise in areas that impact animal agriculture. In addition to the courses required in each emphasis, students choose additional credits from among restricted business, science and/or agricultural electives. Wise choice of these credits allow the pursuit of several goals. The set of courses which fulfill the restricted elective requirement should be developed with the student's advisor, submitted in writing to the Advising Office and placed in the student's record prior to taking the courses. Remember that at least 9 of the 38 credits must be 4XXX including the chosen production course (APSC 4404, 4414, 4424, or 4444). Don't forget to take this into consideration when choosing electives.

Possible strategies for completing the list of restricted electives include:

- 1) sampling courses from several departments to develop a coherent package of credits;
- 2) completing requirements for veterinary medicine and preparing for a career in food-animal medicine;
- 3) completing requirements for a minor in a particular department such as AAEC or Dairy Science;
- 4) completing requirements for a double major in another department.
