## **Current Health Status of the Virginia Tech Beef Herd**

Our goal is to sell the healthiest cattle possible and our current health program is outlined in the sale catalog (page 4). We voluntarily test each year for Tuberculosis, Brucellosis, Johnes, Anaplasmosis, and Bovine Leukosis testing on the sale cattle in an attempt to maintain a high standard.

Our goal is to be transparent as possible with the quality and health of our cattle. If you have any questions about the current situation or any other health questions, Dr. Swecker is available on site to answer your questions.

As always, we appreciate your support of the Hokie Harvest Sale!

Breeding-age bulls and fall-calving cows were vaccinated on 10/23/20 with Express FP 10 for pre-breeding purposes. All adult cattle were treated with Clean Up II pour-on for lice on 10/23/20. Spring-born calves were dewormed with Cydectin pour-on and have received a second dose of Pyramid 10 on 9/12/20. Lots 1A through 4A were calf-hood vaccinated on 9/7/20. Fall-born calves were injected with Vision 7 on 10/23/20.
